## PERSONAL STATEMENT

A trilingual data science and AI enthusiast eager to utilize skills in an internship, with a passion for innovation and societal impact, aiming to contribute by delivering solutions that enhance user experiences.

## PROJECTS

### 1.Acci Tracker: A Road Accident Prediction App

As part of the accident prediction app team, the primary focus was on refining data quality, engineering features, and fine-tuning models for accurate accident severity prediction using machine learning techniques.

**Technical Proficiency:** Machine Learning (Logistic Regression, Random Forest classifier)/ Flask/ Git & Git Hub

### 2. Wine Quality Prediction (Ongoing)

Developing a machine learning model to predict wine quality based on chemical parameters like acidity and citric acid content. Utilizing data analysis and visualization, data preprocessing, and various algorithms to enhance prediction accuracy.

**Technical Proficiency:** Machine Learning (Random Forest Classifier)

### 3.HCHO Insight: Analyzing Air Quality & Climate in Sri Lanka

Engaged in a data-driven project using advanced techniques to analyze formaldehyde (HCHO) data in Sri Lanka for air quality and climate insights. Leveraging technical proficiency to interpret patterns, identify sources, and develop predictive algorithms, utilizing Sentinel-5P satellite observations for environmental sustainability and public health initiatives.

**Technical Proficiency:** Machine Learning (LSTM), Spark, Power BI

### 4.Predicting Income Using Census Data

Currently working on a classification project using census data to predict income. Implementing Naïve Bayes and Random Forest models with optimal dataset preparation and evaluation metrics comparison. Utilizing Python libraries like scikit-learn for model implementation and analysis.

**Technical Proficiency:** Machine Learning ((Naive Bayes, Random Forest Classifier)/ Git & Git Hub

### 5.Ontology for Mechanical Engineering Knowledge

Engaged in a comprehensive project to develop a domain-specific ontology for mechanical engineering. The ontology supports various facets of mechanical engineering, including engineering design, knowledge discovery, quality control, and education.

**Technical Proficiency:** Knowledge Graphs/ XML

### 6.Fuzzy Logic-Based Error Detection and Correction for Data Storage

Developed a fuzzy logic-based error detection and correction system for a data storage company. The system enhances data reliability by identifying and mitigating errors in stored data.

**Technical Proficiency:** Fuzzy Logic/ Error detection/ Python

### 7.MANS Fitness Web Application

Designed the Product and About Us User interfaces (UIs) for the fitness E-commerce website. Implemented front- end functionality using HTML, CSS, and JavaScript. Integrated XML for data management, enhancing user experience.

**Technical Proficiency:** HTML, CSS, JavaScript/ Git & Git Hub

### 8.Rally Championship Management System

Created a JavaFX software individually to manage rally championships comprehensively. The application dynamically generates race dates and locations while efficiently organizing detailed driver information and race- specific data, ensuring seamless championship management.

**Technical Proficiency:** JavaFX/ Java Programming

### 9.SCAMS Club Membership Management System

Led the design and implementation of core features within the school activity club management system. Utilized JavaFX to craft the user interface (UI) and functionality for student member login and signup. Integrated a view table for enhanced interaction and data flow within the system.

**Technical Proficiency:** JavaFX/ Java Programming/ Object Oriented Programming/ Git & Git Hub

## SKILLS & EXPERTISE

### Other Technical Proficiencies

- R
- Py torch, TensorFlow, sci-kit learn
- Power BI, Microsoft Suite
- AWS Cloud

### Soft Skills

- Critical Thinker
- Leadership
- Teamwork
- Problem-solving skills
- Coordination

## EDUCATION

### 2022 - Present

Currently reading the degree in B.Sc.(Hons) Artificial Intelligence & Data Science at IIT affiliated with Robert Gordon University, Aberdeen, Scotland.

### Modules completed in Year 02

Artificial Intelligence  
Advanced Mathematics for Data Science  
Data Science Group Project  
Data Engineering  
Machine Learning  
Professional Development  
Simulation and Modelling Techniques  
Object Oriented Development

### Modules completed in Year 01

Computer System Fundamentals  
Computational Mathematics  
Data Structures and Algorithms for Artificial Intelligence  
Database System  
English Communication Skills  
Programming Fundamentals  
Web Technology  
Computational Mathematics

### 2020 - 2022

Cambridge GCE Advanced Level (Royal Institute International School) Subjects - Business, Computer Science, Economics, Mathematics -A, 2B and E.

### 2019-2020

Cambridge GCE Ordinary Level (Royal Institute International School) Subjects - Business Studies, Computer Science, Economics, Accounting, English, Mathematics, Environmental Management - 2A\*, 3A, 2B.

## VOLUNTEERING

### CLUBS & SOCIETIES

- Member of IEEE Volunteers 23/24
- Member of the Rotaract Club of IIT.
- Member of the Leo Club of IIT.
- Volunteer at Stagecraft-IIT 2023.
- Member of Interact Club of Royal Institute 2021/2022.
- Senior Prefect of Royal Institute International School - 2018-2020.
- Junior Prefect of Royal Institute International School - 2017-2018.

## CERTIFICATES & AWARDS

- Completed grade 02 in CALSDA with Honors - 2016.
- The Sri Lankan Festival For Performing Arts 2011 - All Island Winner.
- Received Distinction & Commendation in Sri Lankan Festival For Performing Arts - 2009, 2010, 2011 and 2012.

## REFERENCE

### Dr. Sumann Subramaniam

#### CIO - Decode369

Co-Founder - Synergy Skills

CISO Advisor | Security Research
